SUMMARY

Frontend Developer with **5+ years of experience** designing, developing, and modernizing enterprise-scale web applications using **React, TypeScript, and JavaScript**. Experienced in building scalable component-based architectures, integrating with microservice-based backends, and delivering responsive, high-performance user interfaces.

WORK EXPERIENCE

Wipro Technologies Romania

Frontend Developer | 2021 - Present

- Develop enterprise React and TypeScript applications for a global retail and merchandising client
- Build reusable UI components and complex data-driven interfaces
- Integrate REST APIs using RTK Query
- Migrated a large production application from CRA to Vite
- Implement Playwright E2E tests and increased regression coverage
- Collaborate with backend, QA, UX and Product in Agile teams.
- Delivered major enterprise features
- Contributed to frontend architecture improvements that increased maintainability and developer productivity
- Improved application performance through modern frontend optimization techniques

PROFESSIONAL STRENGTHS

- Strong analytical and problem-solving skills
- Excellent communication within international teams
- Ownership mindset with attention to quality and maintainability
- Continuous learner passionate about modern frontend technologies
- Experienced in collaborating across engineering, QA, UX, and product teams
- Ability to translate business requirements into scalable technical solutions
